

Deeper covi-city 3.0

Friday 11th September ("9-11"): 1300-1430 (UK time) - online

The pandemic response / recovery is a crisis for cities, but also (maybe) an opportunity for transformation....

- 'City making' - design & construction, housing & urban development etc – all essential parts of the picture.
- So how to steer from crisis to transformation????
- The principles of '**collective urban intelligence**', as in **Deeper-City-3.0**, aim to provide some keys to the way forward....

This interactive *Mind-Lab* explores the post-pandemic *Deeper City* – one where the many layers of economies, technologies, cultures, psychologies, and social systems all connect.

It's also a launch of the new book

[Deeper-City-Collective-Intelligence-and-the-Pathways-from-Smart-to-Wise](#)

With: Joe Ravetz, University of Manchester UK

THE PANEL (From east to west):

Sheila Sri Prakash, Shilpa Architects, India

Christina Garzillo, International Council for Local

Environmental Initiatives, Germany

Maria Cerreta, University of Naples FSII, Italy

David Rudlin, URBED, UK (host)

Rachel Cooper, ICA, Lancaster University, UK

Ulysses Sengupta, Manchester School of Architecture

David Feeney, Chief Planning Officer, Leeds City

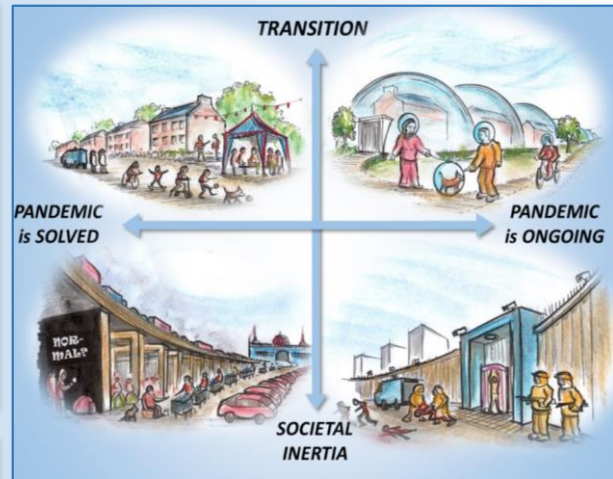

Council, UK

Peter Marcotullio, City University NY, USA

This interactive *Mind-Lab* has three aims: -

- explore the scope for 'city-making' – (design, planning, services, local economies etc) - to turn crisis to transformation.
- Explore the potential for a '**collective urban intelligence**', to enable such transformation.
- Work towards a short report, to set the scope for an international funded program.

We use the Synergistic method of interactive visual thinking with online whiteboards.
