

Future-wise Hub & Collaboratorium

Basic instructions

Link - <https://hubs.mozilla.com/meeV34u>

On entry: select 'join the room' & enable mike

Avatar: best to label it with your name (you can select different avatar images from menu)

Navigation: (forward / backward / sideways) - press arrow keys or 'A,S,W,D' -

Turn: with a left click mouse pointing in that direction (or press E).

Audio: – just like real life, if you are closer to someone = more sound

Flying: put '/fly' in the chat & point upwards for aerial view.

Communications: put a message in the chat to talk to everyone

'The real you': share your laptop camera - with the purple 'share' control at the bottom

Gallery spaces: you can pin an image to the exhibition boards: 'place' control at the bottom & 'upload' image from a location. (placing objects is similar but may cause file-size problems). Note objects will disappear when you leave – for permanent fixtures contact admin.

Problems & crashes: just leave and re-enter the space

Devices: works best on up to date laptop / PC, with mouse control: headphones better for audio (full VR headset is an option).

....All this takes a few minutes practice - or – wait in lobby for guided tour.

(If you are under 35 it's totally easy...)
